NEW ENGLAND

Franklin Park Zoo • Stone Zoo

www.zoonewengland.org

Study Guide:

- A lion's roar can be heard three to five miles away.
- Lions are the only cats that live in large, social groups called "prides."
- Lions are sprinters, not long-distance runners. They can reach top speeds of 33 miles per hour.
- Female lions are the pride's primary hunters.

Congrats! Sprint to the head of the class!
